

MOTION BY SUPERVISOR MICHAEL D. ANTONOVICH

MAY 8, 2007

INFORMATION TECHNOLOGY TRAINING

Technology within Los Angeles County is rapidly growing and has led to increased productivity. Technology is used 24 hours a day to provide services to employees, business partners, and clients of Los Angeles County. Information Technology will continue to play a major role as the County strives to improve efficiency and effectiveness. Accordingly, Information Technology professionals must consistently maintain their skills and competencies. Keeping these skills current requires continuous learning and partnerships with Information Technology training providers that offer comprehensive and up-to-date technology skill training.

I, THEREFORE, MOVE that the Board of Supervisors direct the Chief Administrative Officer, Director of Human Resources, and the Chief Information Officer to identify the specific Information Technology needs of the County workforce and determine whether it would be beneficial to establish an onsite training program at County facilities, and report back in 60 days.
